G. Engineering Services Agreement-Work Order-CDBG Water Main Replacement 

Jennifer Anders, Engineer for Woodard and Curran, explained the above-stated engineering service agreements as follows:

(E) The amendment to the agreement for the North WWTP where all the Smithfield waste is processed is a change order. Due to the fact that Smithfield has plans for increased production, which was not allowed for in the original design, it was necessary to make changes to that design. Mayor Davies pointed out that the upgrades for the North WWTP are being funded by Smithfield.

(F) Woodard and Curran has been selected to perform the engineering design of the City utility extensions for water and sewer for the Love’s Truck Stop at the intersection of West 11th Avenue and Route 67. W & C’s services will amount to $151,000, which will be reimbursed by Loves through an existing agreement.

(G) The Engineering Service Agreement for the CDBG Water Main Replacement is needed as the City is seeking another grant in addition to their successful award of this year’s CDBG grant, which will be used to replace water mains and their appurtenances. The deadline for the grant is August 30th and the project has to be “shovel ready”, which requires that pre-engineering be completed before the application is even considered.

   Administrator Steinbrecher added that if there is a project that the City needs it for, the City would request from the Agency it ceded it to that the bonding authority be given back to the City to be utilized for its project.
