City of Monmouth

Dear Lewis Steinbrecher

Following up on the city meeting in April where I had requested the following.

- Permission to fix the sidewalk and possibly pave the gravel / sidewalk area on west side of main plant running parallel to D street.
 - This permission has been granted.
- Requesting City of Monmouth vacate south B street from tracks to middle of intersection of B & 6th Ave. Allowing MPF to maintain this portion of road due to heavy truck traffic and company needs. This would be identical to permission you granted for West 8th behind treat plant.
 - *Requesting this issue to be granted in writing.*
- Request for 6th street to be resurfaced and the S curve of 6th and D be fixed as soon as possible, as well as the 6th and D street where we have major pot holes, this could possibly be playing part in the elevated problem with trucking company's breaking off telephone poles.
 - Update from Andy Jackson was that 6th Ave. resurface project would be early August.

Warm regards,

Mike Sheid
Plant Manager
